In case the waiver of premium is triggered, no Unexpired Risk Premium shall be payable to the Secondary Life Insured. Unexpired Risk Premium shall be payable as per the formula below:

$$\text{Unexpired Risk Premium} = (\text{SVF}) \times P \times (U/T) \times (P/PP)$$

where:

SVF = The Surrender Value Factor (SVF) of 70%

P = Premiums paid till date of surrender excluding applicable tax, modal loadings and underwriting extra, if any

U = Outstanding Policy Term (in months)

T = Policy Term (in months)

PP = Total Premiums payable excluding applicable tax, modal loadings and underwriting extra, if any

Premiums Paid	GSV Factors
1-3	75%
4 and above	90%

Surrender of the policy shall extinguish all the rights and benefits under the Policy.

Paid-Up Benefit: Paid Up Benefits will be applicable only for the Return of Premium Option. If the Policyholder does not pay the due premiums within the Grace Period, the Policy shall be converted into Paid Up on expiry of the Grace period. Once the Policy becomes Paid Up, all the benefits under the Policy would be reduced and calculated as given below.

Paid Up Benefits	Paid Up Benefits Payable
Death	Paid Up Sum Assured on Death (payable in the form of death benefit opted at the time of inception)
Maturity	Paid Up Sum Assured on Maturity
Surrender	Higher of: 1. Special Surrender Value (SSV) = Total of premiums paid till Date of Paid-up (excluding any underwriting extra and any applicable taxes) * SSV Factor/1000 2. Guaranteed Surrender Value (GSV) = Guaranteed Surrender Value Factor * Total of premiums paid till Date of Paid-up (excluding any underwriting extra and any applicable taxes)

Paid up Sum Assured on Death = (No of Premiums received / No of Premiums payable) X Sum Assured on Death;
